

Area Descriptions

An area for everything

There are many different areas to discover at this year's Pet Expo

Main Exhibition Hall

Have you ever seen a Kookaburra or a Steppe Owl from the African plains? Down in the jungle, the children will be submerged in the South American Rain Forest at the new Wildlife Café.

While mum and dad relax over a delicious coffee, the children can learn about conservation in the jungle, meet animals and birds both large and small, and taste some real jungle fruit juice!

You may also want to start a new hobby after visiting the show this year. Have you ever seen colourful fancy pigeons? These are not to be confused with the racing pigeon build for speed! 'Bird World', with over 100 different colourful fancy pigeon varieties, the Irish National Fancy Pigeon Association bring us a unique display of birds. Beautiful aviaries will also be presented by Copsewood, showing us a large variety of birds from all over the world. Rare and exotic birds will be alongside the more well-known, and ever-popular finches, buggies and parakeets.

Stunning Rabbit World

Chins, or to give them their correct name, 'Chinchillas', from the South American Andes, will present alongside Velvetine Rex, Angora, Dutch and Flemish Giant, which are some of the exotic pedigree rabbits on show for the first time at Pet Expo. Also watch the little Lop Eared rabbits hop and play in their

specially-designed, see-through play tubes and burrows.

Professional rabbit keepers and pedigree show rabbit keepers will be on hand throughout the three days with information on care, feeding and keeping of all types of rabbits.

Dog Owners

Watch the professional dog groomers at work and talk to the ROYAL CANIN BREED VILLAGE pedigree dog owners about the most suitable type of dog for your lifestyle.

Main Stage

Fancy holding a Burmese python and learning why all reptiles don't make good pets? The Reptile Village will return with an amazing display of reptiles, large and small.

Does your kitten climb the curtains or does a sneezing cat really bring you good luck? 'Feline Myth Buster', Alice Chau-Ginguené, cat behaviourist, will give a fascinating presentation on the main stage each day of the show.

The first animal healer to offer relief from emotional stress for dogs, cats and horses and gives real healing to a wide range of conditions is Elizabeth Whiter. Her pioneering healing work will be demonstrated live on stage and she will also be signing copies of her latest book 'The Animal Healer' on Friday and Saturday.

Cat owners check out our introduction to the CONNOLLY REDMILLS WORLD OF CATS at the clock tower and make sure you catch the stage presentations from our cat behaviourist.
